

Stephanie Tumamos is a Filipino doctoral student at the Technical University of Munich, Germany in the field of remote sensing. She has a background in applied physics, environmental engineering and geoinformatics. Aside from her academic pursuits, Stephanie is also a passionate science communicator. She hosts the podcast called, "Down to Earth: A Podcast for Geoscientists by Geoscientists," created by the IEEE Geoscience and Remote Sensing Society (IEEE GRSS) where she invites experts in the field of innovative geoscience and remote sensing, and talk about their science, careers, and passion. She is currently the chief of publicity and PR of IEEE GRSS and also, the youth ambassador of the International Society for Digital Earth.
