Christian Langer is a male professional with a diploma and master's degree in landscape architecture, which he earned in 2009 and 2012, respectively. In 2014, he completed additionally a GIS degree in Berlin and worked as a GIS programmer for two years at iDiv. From 2016 until 2020, he served as the IT-organizer for GEO BON at iDiv. During this time, he was responsible for building and maintaining the website www.geobon.org, developing the EBV data portal, including the EBV catalog, and creating the first version of the EBV metadata standard. In 2020, he joined the iBON project as a Web-GIS Programmer, where he continues to research the development of the EBV data portal and metadata standard at iDiv. Additionally, he provides technical support for web and GIS projects within the iDiv community, manages the member databases of various projects such as EuropaBON and NaturaConnect.

Throughout his career, Christian Langer was awarded the 1st place and the Use of GEOSS Resources and GEOSS Relevance Award for his solution to the GEOSS/HACK 2018 at the European Space Agency in Frascati, Italy.
